

yan

Run
Away

Don't play the game, you know they banned us
We don't obey the rules at all
We are the ones they call the villains
Oh can't you see we need to run?
I know you think oh, what's the point now?
The bird is scared to leave the cage now
I could, I could, I could run away with you
I could run away with you,
Wanna run away with you
Don't look back, take off and run away with me
Find a way to run with me
Now it's only you and me

I think I know just what you're feeling
Your hands are tied, can't make a move
This straight jacket that you're wearing
Won't keep you warm, its killing you
Unleash your heart, its suffocating
Unleash your heart and set it free now

I promise they will never find us
We'll hide so well that they'll forget
(they will forget about us, babe)
We'll have our happy ever after
We won't remember the regret

Please see that I, I could run away with you
Wanna run away with you
I could run away with you
Please take my hand, come and run away with me
Find a way to run with me
Now it's only you and you and you and me
I could, I could, I could run away with you
I could run away with you,
Wanna run away with you
Don't look back, take off and run away with me
Find a way to run with me
Now it's only you and me
